TRIAGE COLOR CODED TARPS

DMS-05004

SK-250 HAZMAT SKED

Patients can be rolled onto the HMD Sked rather than lifting or carrying. This creates less rescuer fatigue and allows many more victims to be saved.

MegaMover™ Plus #MM4080

- Each 40" x 80" unit weighs only one pound
- 6 handles on each side provide for ergonomic lifting and add to functional width of the sheet
- Gray/Black color decreases visibility where security is vital
- Accommodates standard backboards for added patient support during transport

Decon Triage Tags with Bar Coding and Tear-away Receipts

In response to the post 911 world and the needs of the emergency response community, California Fire Chiefs Association has now endorsed the new Synthetic Paper Medical Triage Tag from Disaster Management Systems. Six years in development, this tag is now endorsed by California Medical Response (MMRS) cities and will provide standardization in the State of California for major disasters.
