

Gas Mask and NBC Canister

North's Gas Mask and NBC Canister were designed to protect emergency responders in non-IDLH atmospheres that contain chemical, biological agents and radioactive dust. Intended users include:

- First Responders:
 - Fire Fighters
 - Police Officers
 - Emergency Medical Technicians
- Second Responders:
 - Hazmat Teams
 - Crime Scene Personnel
 - Remediation and Clean-up Personnel

The Gas Mask has a 40 mm threaded connector that accepts USA/ Military, EN and NATO type thread canisters, and has met the permeation requirements for US military masks. The NBC Canister meets the performance requirements of NATO and US military specification as a Chemical, Biological Canister (US Army C2A1). See Permeation and Service Life Test results on back.

Features	Benefits
• Lightweight facepiece design	• Comfortable and reduces worker fatigue
• Oral nasal cup	• Reduces lens fogging and limits re-breathing exhaled air
• Hard-coated polycarbonate lens	• Wide field of vision, impact and scratch resistant
